

DREAMSCREENS SALES KIT

19 X 19 Demo door

Dreamscreens logo bag

The measuring kit is very useful for the person measuring the door height. The kit components allow the user to duplicate the location of the screen housing and guide rails and thus determine the optimum location and fastening method for the housing and the magnet components.

Measuring kit (put in plastic baggie):

- Housing with end caps and clips

- Pull rail with 1 handle, foam bumper (pinch ends), magnet (no screws, pinch ends)

- Jamb/ jamb support/ magnet with (1) screw and (1) clip

- Top guide rail

- Bottom guide rail

- Standard threshold

- Flat threshold

- Front threshold

- Step threshold

- Top seal

- Molding shim

- Housing cover

- Screen tube section

- Piece of corner welded screen

- Color chips

- Screen samples:

 - 18X14 charcoal

 - 18X14 gray

 - 20X20 charcoal

 - Sunscreen charcoal

 - Sunscreen white
