

How to measure for a Dreamscreen

dreamscreens

The world's finest retractable screens

2033 Princeton St, Sarasota, FL 34293

941-953-4529 / 888-757-0929

Measuring

- When measuring for a dreamscreen, it is important to get the height correct.
- The width is adjustable on site, so this is less important.
- If your opening is 48" wide or less, a single dreamscreen will work for you.
- If your opening is over 48" but less than 96" wide, you'll need a double.

Determine location

Do we want flush or surface mount? Here, we have the option for both

Surface or face mount

Surface mounts on the face. We need a minimum of $\frac{3}{4}$ " of flat surface for this

Surface type

Measure here, here, here

To bottom

Take the smallest measurement

How to measure for a Dreamscreen

Flush mount

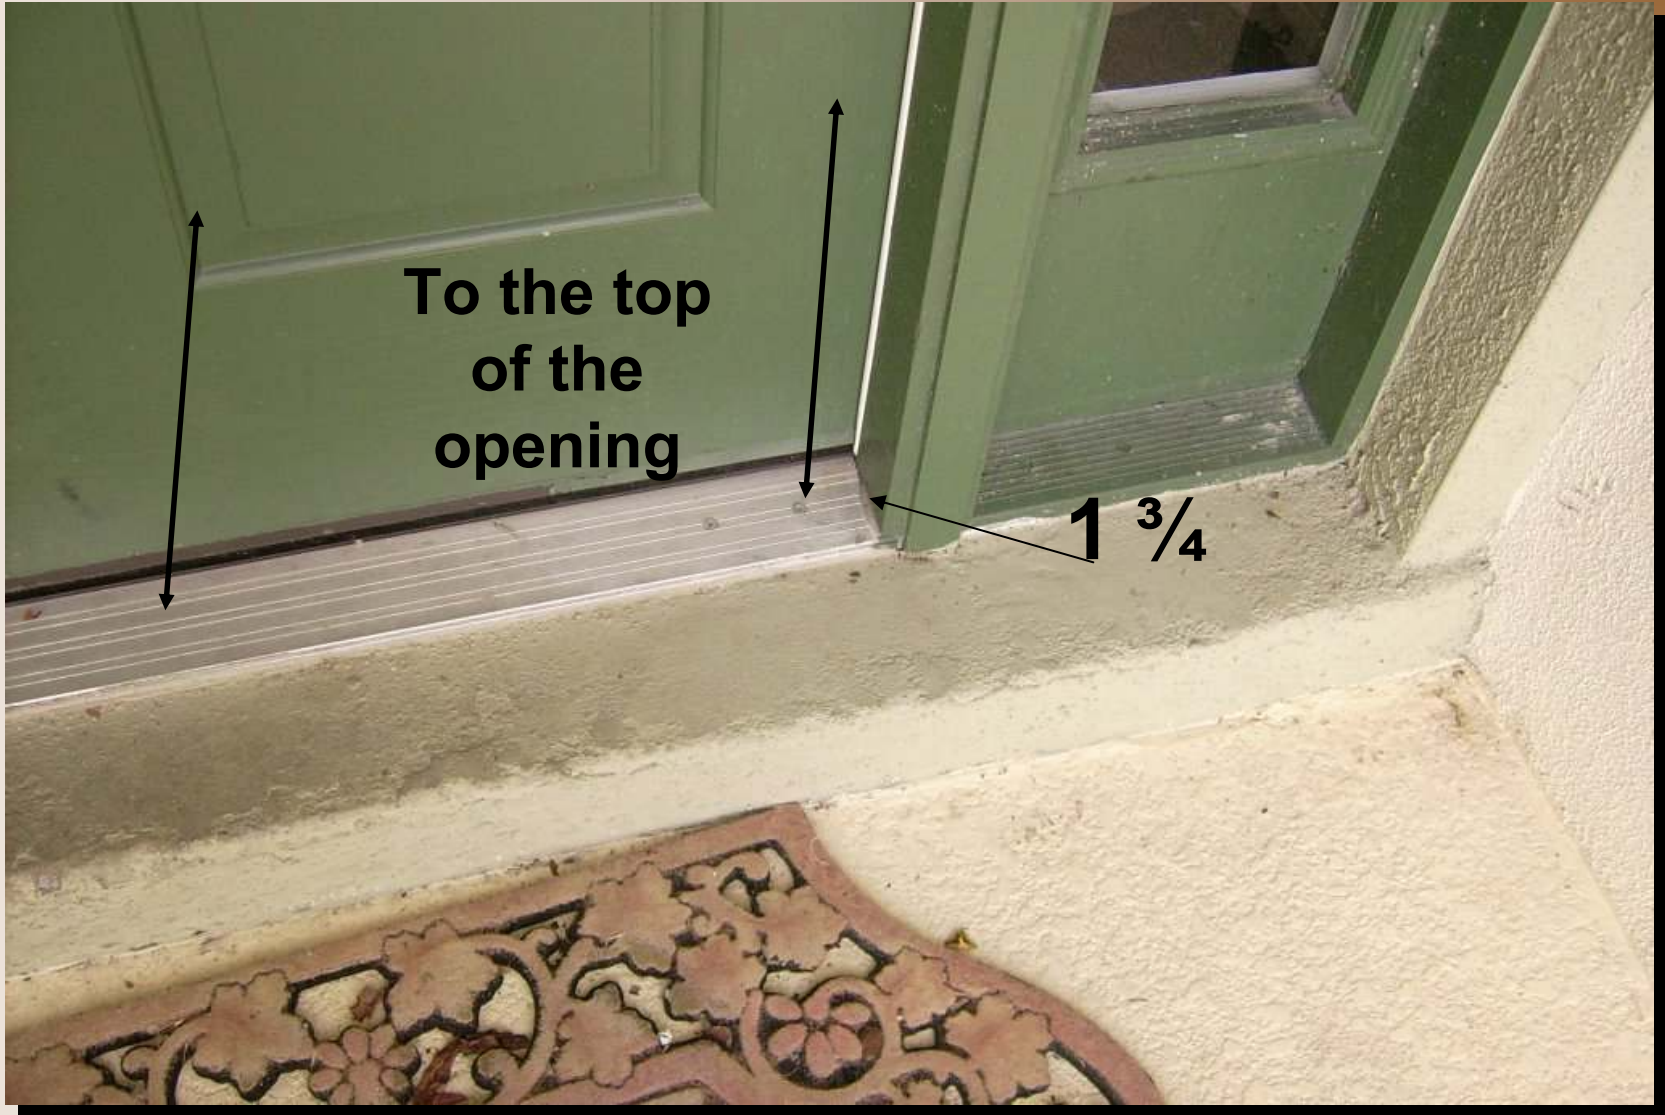

Flush mount

Flush mount goes inside the opening

Be sure there is 1 3/4" of depth

To the top
of the
opening

1 ³/₄

Measure to the top

Take the smallest of the three

That's all there is to it.

Once you have the correct measurement, you're ready to order your new Dreamscreen.
